

REMOTE ACCESS KNOW WHO IS AT YOUR LOCATION 24/7

Do You Have Unauthorized Personnel Entering Your Site?

PetroCloud's remote access solutions let you open, close and monitor remote entry points on any web-enabled device. Determine who is at your location and take action based on who it is, without a gate guard or human intervention.

Provided as an all inclusive service with no software to purchase or install, you can now reduce theft and vandalism while saving on overall security costs.

Applications

- Remote gate access control
- Vehicle and pedestrian entry/exit areas
- Door systems
- Remote facilities
- Equipment depots
- Conex containers

Phone or Mobile Device

- ▶ Phone serves as badge for entry/exit
- ▶ Bluetooth® connection between phone and key pad
- ▶ Phone has trusted and established authentication

License Plate Recognition

- ▶ Cameras detect motion at entry/exit points
- ▶ Software automatically identifies plate characters
- ▶ Number plates compared with pre-defined lists
- ▶ 'Approved' plates trigger automated actions (i.e. open gate)
- ▶ Plate numbers archived

Vehicle Tags and Toll Sensors

- ▶ Uses small sensors or existing toll tags on vehicles
- ▶ Tags are recognized by entry/exit point devices
- ▶ Quick and simple way to control access
- ▶ 'Fast Pass' lanes reduce bottlenecks

Traditional Restricted Entry

- ▶ Key pad number entry
- ▶ Badge and card readers (works with existing badges)
- ▶ Video entry
