

Light Tower Surveillance

IMPROVE VISIBILITY— ONSITE OR NOT.

Light towers improve visibility for personnel at every worksite – but what about visibility when no one is on-site? What if you could pair the convenience and on-site visibility of a light tower with high-definition video surveillance, accessible from your smartphone? With TowerWatch you can turn any portable light tower into a complete video surveillance solution. Magnetically mounted and designed for harsh, off-grid environments, each solution includes a 360-degree PTZ HD camera with stabilization, batteries, power source connection (solar or line), and our proprietary Remote Computing Unit (RCU) to provide access and connection to our web-based Platform for 24/7 surveillance.

PORTABLE SOLUTION

The TowerWatch is easily transported to any location, mounted in minutes, and powered by line or solar connection.

MAGNETIC MOUNTING

Industrial strength magnets make it easy to secure the TowerWatch to your existing light towers without drilling or damaging the ground or tower.

INDUSTRIAL-GRADE CAMERAS

Waterproof, weatherproof and tamper-resistant, TowerWatch is an industrial-grade solution designed to operate in extreme temperature ranges and weather conditions.

REMOTE SURVEILLANCE

Monitor and control your portable surveillance system from any device, anywhere in the world via our web-based platform. Video footage is uploaded to the cloud and available to stream in real-time, with unlimited storage.

SECURE DATA STORAGE

With cloud data storage and our event-driven technology, video footage is never lost – even if the camera or equipment is destroyed.

MULTIPLE LOCATIONS, UNLIMITED USERS

Need cameras in more than one location? No problem – and with unlimited users, from a single site to thousands of locations across the country, you can provide on-site visibility to your entire team for no additional cost.

DESIGNED FOR OFF-GRID LOCATIONS

Our solutions require limited bandwidth and low power consumption, making them ideal for remote areas with no existing internet access or grid power and poor cellular coverage. With our proprietary cellular technology and custom solar solutions, we bring the “grid” to you!

24/7 MONITORING AVAILABLE

Get personal service with every installation. Our Network Operation Center (NOC) monitors access 24/7, providing a security solution you can trust.

KEY BENEFITS

- ▶ Portable surveillance solution
- ▶ Self-Deployed monitoring
- ▶ Ideal for no-notice or short-term use
- ▶ Reduce risk of theft
- ▶ Actively monitor processes and operations
- ▶ No internet connection needed
- ▶ Live HD Video streaming HD capability
- ▶ Motion detection
- ▶ Night vision
- ▶ Available thermal vision
- ▶ Available license plate recognition
- ▶ Single dashboard & unlimited users
- ▶ 24/7 security monitoring
- ▶ No software or plug-ins to download or update

LIGHT TOWER SURVEILLANCE

Our number-one portable surveillance solution, TowerWatch is easy to deploy and move from one location to another. Light towers and spotlights are fixtures at most job sites—and with our solution you simply attach the magnetically mounted box to a metal pole, plug it in, and go.

AN IDEAL SECURITY SOLUTION FOR:

- ▶ Law Enforcement
- ▶ Private Security
- ▶ Land Owners
- ▶ Oil & Gas Operators
- ▶ Concerts & Outdoor Venues
- ▶ Highly Vulnerable Facilities
- ▶ Farms and Ranches
- ▶ Construction Sites
- ▶ Hospitals
- ▶ Rapid Response Equipment Storage
- ▶ Sporting Events
- ▶ School Monitoring
- ▶ Utility Substations
- ▶ Disaster Recovery
- ▶ Parks and Local Landmarks
